Mechanical Engineering graduate and Software developer with over 2 years of experience specializing in crafting responsive, high-quality user interfaces for web and cross-platform mobile applications and eager to continuously improve my skills and learn more about new frameworks and technologies.

WORK HISTORY

Jodna Technologies

Frontend Developer

Remote

July 2025 – Present

- Developed responsive web and mobile applications using React, Next.js, React Native, and Flutter, improving performance and ensuring consistent user experiences across platforms.
- Integrated RESTful APIs and built scalable features including authentication, navigation, and dynamic data handling to enhance reliability and interactivity.
- Collaborated with designers and backend engineers in an Agile environment to deliver high-quality features through efficient deployment pipelines.
- Optimized application performance through code splitting, lazy loading, and efficient state management, resulting in faster load times and improved user experience.

Afriworks Engineering Services

Engineering Technician

Port Harcourt, Rivers

May 2025 – March 2026

- Assisted in maintenance, inspection, and repair of mechanical systems and workshop equipment.
- Supported senior engineers during routine servicing and troubleshooting operations.
- Participated in machining and fabrication processes for engineering components.
- Contributed to workshop operations, ensuring efficiency and adherence to procedures.
- Ensured compliance with safety standards and proper workshop practices.
- Documented maintenance activities, inventories and contributed to technical reports.
